

Backup-as-a-Service

Protect your Data with Carbon60's Backup & Recovery Services

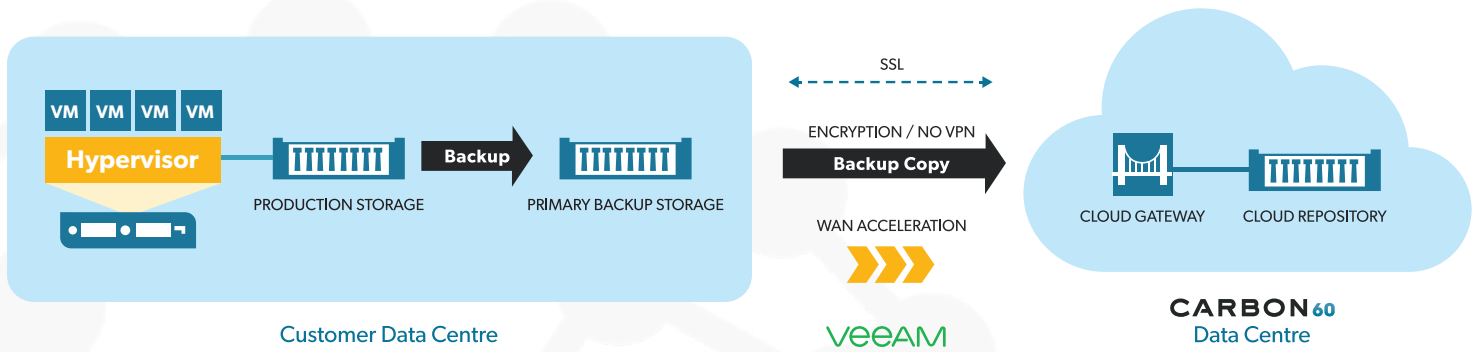

Carbon60's managed backup solution using Veeam Cloud Connect is engineered to protect the integrity of your data. Backup-as-a-Service eliminates the need for you to build and maintain an off-site backup target, enabling you to rest assured that you have a recent copy in case your primary site fails or is under a security attack. Our team of experts ensures that our scalable, enterprise-grade backup repositories are always available to store your backups and can help you when you need to restore to recover from data loss quickly.

We are a Veeam Silver CSP Partner providing cloud backup and DR solutions on our reliable and scalable cloud infrastructure platform.

MANAGED HYBRID CLOUD SOLUTIONS

How it Works

The 3 Rule

Keep your data safe and secure from almost any failure scenario. Carbon60 customers can maintain three backup copies of their data, two on different storage media and one located offsite in our secure cloud infrastructure.

Easy access to all your Backups

Extend your local Veeam backups to Carbon60's backup repository seamlessly and restore anytime you need it or ask our team for help.

Enterprise-Class Cloud

Our cloud infrastructure is scalable, reliable and proactively monitored for availability, located in top-tier data centres in Canada.

Reduce Total Costs of Ownership

No need to invest in hardware that ages and gradually becomes obsolete. Take advantage of the cloud's scalability to pay for only what you need and let us handle capacity management and capital costs.

End-to-End Encryption

All data is encrypted at the source, in-flight and at rest, without impacting the data reduction ratios of built-in compression and WAN acceleration.

Secure & Compliant

Security by design with SOC2 compliance, top-tier data centres, encryption and several cloud platform security measures.

ABOUT CARBON60

Carbon60 is a managed cloud services provider for mid-market and enterprise customers. The company offers private, public and hybrid cloud services and a full suite of managed services including monitoring, performance optimization and testing, security, disaster recovery, backup and CDN services. Carbon60 is also the leading provider of application hosting for content management systems in Canada.
