

The Carbon60 Managed AWS Cloud delivers tightly integrated managed services to help you unleash the benefits of the public cloud

As a leading AWS Consulting Partner, we provide full white-glove treatment from assessment and design to implementation and fully managed secure AWS operations support for your critical workloads, allowing you to focus on your core business and applications.

Assess Existing IT Infrastructure

We assess your current state based on your objectives to identify readiness for your workloads - quick wins and longer-term projects.

Design AWS Architecture

Our cloud architects design and build your solution leveraging the AWS Well-Architected Framework tailored for your business.

Migrate Workloads to AWS

We use our proven methods and experts to create and execute migration plans and move your critical workloads.

Security & Compliance Posture

Leveraging AWS and 3rd party security tools, combined with our own SOC2 compliance helps you meet your own security obligations for your clients.

Manage the Entire AWS Solution

We monitor and manage your AWS solution 24/7, and optimize and adjust your initial workloads and help you move more workloads when you're ready.

Efficiencies Through Automation

Our DevOps experts help automate processes across your CI/CD pipeline, provide container guidance to improve efficiency and resilience to reduce risk.

The Carbon60 Difference

Carbon60's success lies in our commitment to deliver reliable and flexible managed cloud solutions with the highest-level of accountability and service quality.

AWS Expertise

Certified experts apply best practices to designing, deploying, monitoring and managing secure workloads on AWS. Reduce your operating expense and leverage a team of cloud experts to augment your own.

Security First Approach

We leverage AWS security frameworks and our experience and internal SOC2 compliance and support for PCI, HIPAA and other compliance mandates to support clients.

Hybrid Cloud Integration

For workloads not suitable for the cloud, leverage Carbon60's managed hosting solutions for a hybrid solution.

White-Glove Support

Dedicated support and DevOps techs are available 24x7x365 to ensure your applications and workloads are always available and performant.

Flexible Operating Models

If you're new to cloud and want us to handle it or already use AWS and need us to take it over or just help manage it, we are flexible in our approach.

Support for Multiple Use Cases

Take advantage of the breadth of experience we have across industry verticals that we can apply to your unique use case.
